TROUBLESHOOTING

- No picture after providing power.**
Possible power supply voltage abnormality. Check for proper power supply voltage and polarity. Ensure that all the connecting cables and monitors are hooked up properly.
- Interference (hum bars) are moving through the picture.**
Check the monitor and peripheral equipment used.
- The picture background changes color continuously.**
The fluorescent light's electromagnetic field can cause color roll. This is a normal phenomenon. Reduce the number of fluorescent lights, or increase the distance between the camera and the fluorescent lights.
- The picture quality is poor or "fuzzy"**
This is usually due to poor quality cables or poor connections. Ensure that all the connecting cables and monitors are hooked up properly, or switch to higher quality connecting cables.

LIMITED WARRANTY

This warranty remains in effect for one year from the date of purchase. Except as specified below, this warranty covers all defects in material and workmanship. The following are not covered: Damaged caused by accident, misuse, abuse, product modification or neglect, damage occurring during shipment, damage from failure to follow instructions contained in the owner's instruction booklet, damage resulting from the performance of repairs by someone not authorized by Retina Security Equipment, or any claims based on misrepresentations by the seller. This warranty does not cover incidental or consequential damages. It does not cover the cost of removing or reinstalling the unit. This warranty is void if the serial number has been removed or defaced.

This warranty gives you specific legal rights. You may also have other rights which vary from state to state. Some states do not allow the exclusion or limitations of incidental or consequential damages or limitation on how long an implied warranty lasts so the above may not apply to you.
